[How To Compare Two Web Config Files](#)

---

Nov 21, 2013 - When dealing with multiple development environments, it can often be quite tricky to keep track of the different environment specific settings.

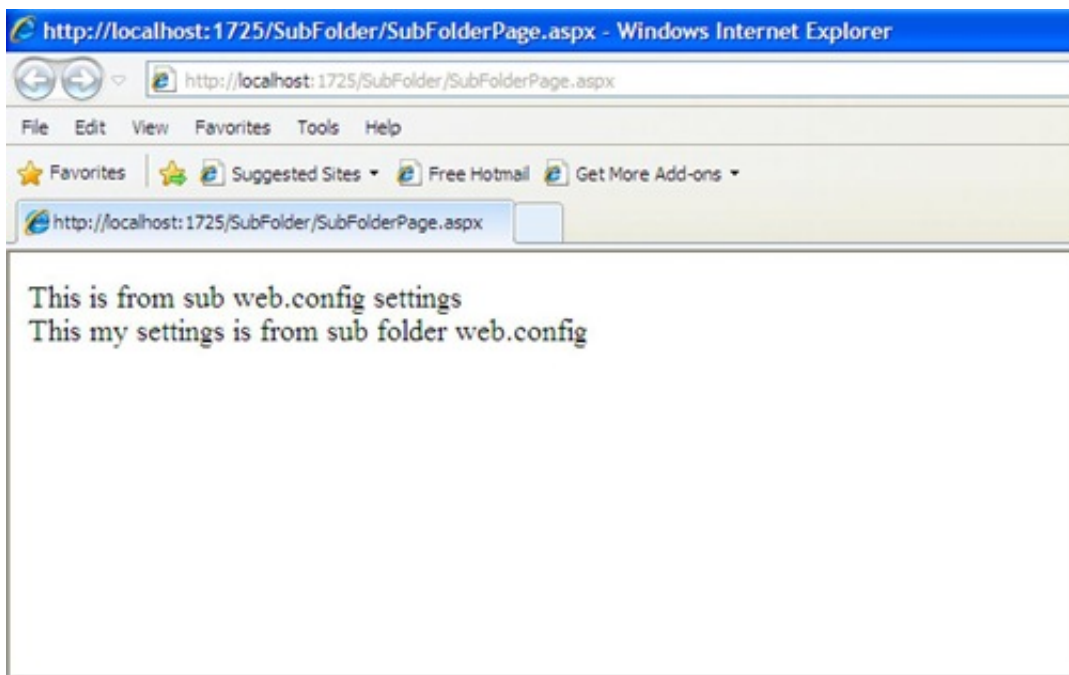

1. [compare config files](#)
2. [compare config files online](#)
3. [ansible compare config files](#)

For the two given web config files (these are paths to the file) we must validate that both have the same amount of entries under the AppSettings (order is irrelevant) and they have the same values on each.

## compare config files
